PADDLE

Paddles are critical to paddleboarding. The greatest influence is the speed and direction of gliding. Flexibility and strength are the main factors in choosing a paddle, and with different materials, clamps and handles, different paddles will bring different paddling experiences.

TECHNOLOGY

Handle
The ergonomic top and wide grip create powerful leverage of the entire paddle.

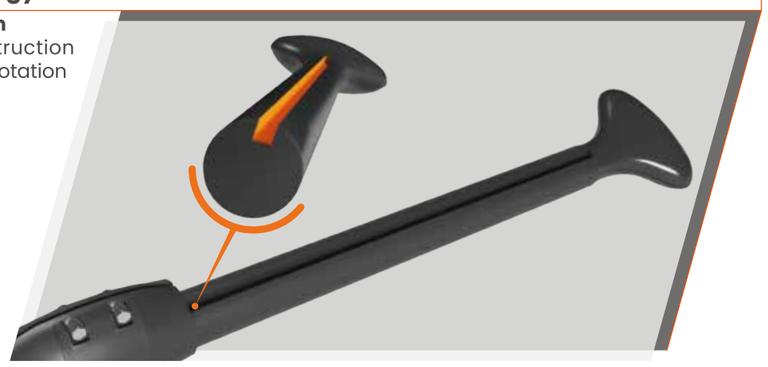

Shaft Clamp System
Different clips determine the linkage of the multi-section paddles.

Composite Blade
Different components of blade affect weight and water repellent ability.

Shaft Technology

Anti-twist system
Pre-slotted construction prevents paddle rotation during use.
