BEYOND THE HORIZON !

71% of the world is waiting. Get on the water.

Step away from the shore and into your element. From the rhythm of open swells to the stillness of a mountain lake, Zray puts you exactly where you want to be — on the water, in control, fully alive.
Your next chapter starts here.

PACKAGING

Zray's color boxes enhance product protection and transportation efficiency through precision cutting, vivid printing, and double-wall construction for optimal container utilization.

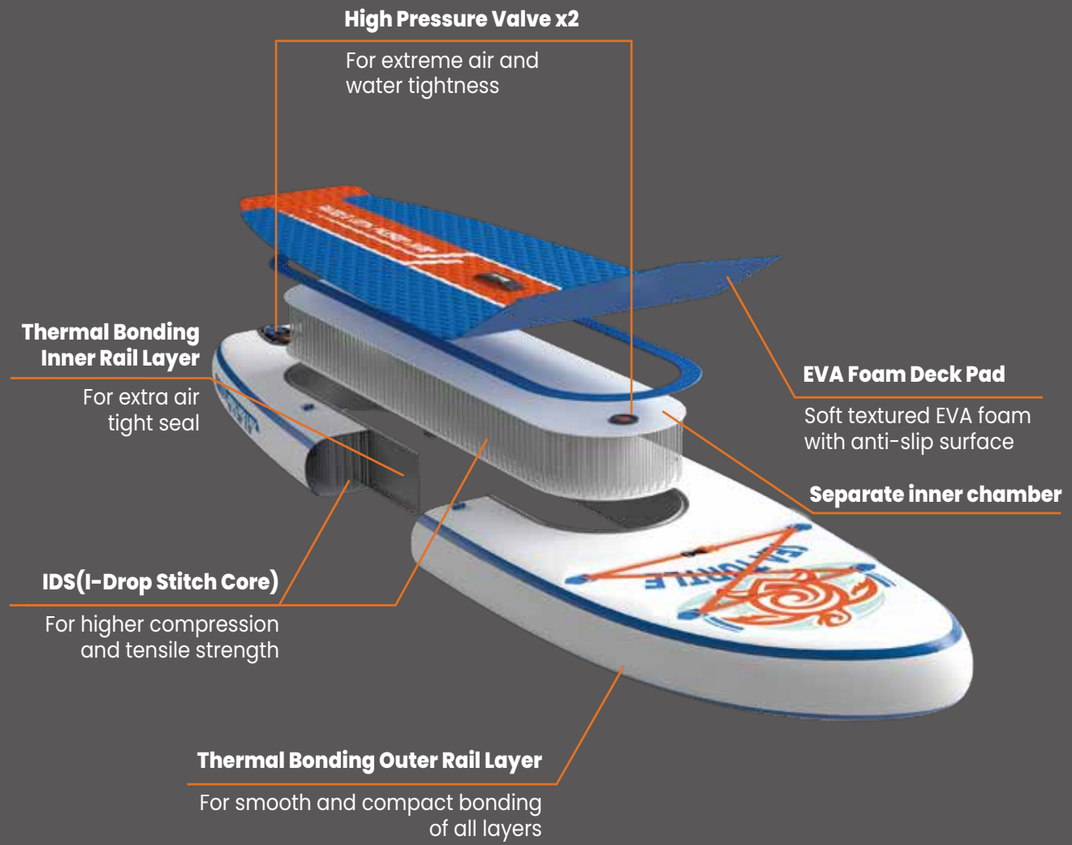

INNOVATION

DOUBLE CHAMBER TECHNOLOGY

The second separate inner chamber occupies 50 percent buoyancy of the total board flotation, ensuring the paddler's safety in case of board leaking. Patented structure. Conform to ISO6185.

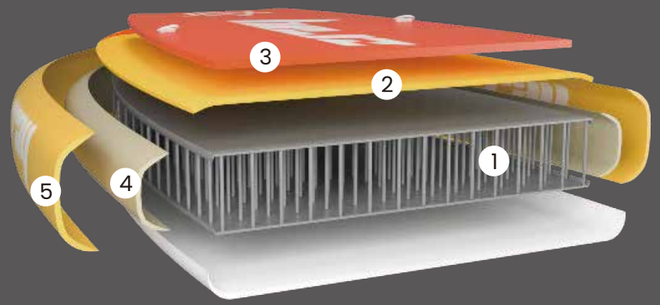

TECHNOLOGY

ULTIMATE AGILE LIGHT TECHNOLOGY

Optimized drop-stitch density and reduced yet reinforced PVC layering offer easier handling, quicker acceleration, and improved portability, ideal for travel and all-around recreational use.

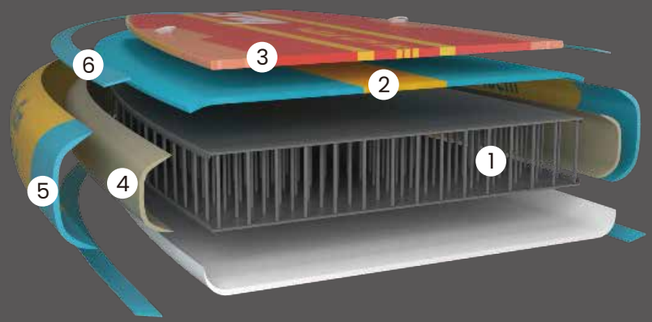

1. Optimized Drop Stitch Core (Polyester Yarn)
2. Double-Sided PVC Coating Layers
3. EVA Footpad
4. PVC Rail Bonding Layer
5. Decorative Laminated Mesh Layer

BALANCED ANTI-BENDING MOTILITY TECHNOLOGY

Additional rail reinforcements and high-tension core materials deliver greater stability, improved balance, and reliable performance, making it suitable for advanced riders.

1. Drop Stitch Core (Polyester Yarn)
2. Double-Sided PVC Coating Layers
3. EVA Footpad
4. PVC Rail Bonding Layer
5. Decorative Laminated Mesh Layer
6. Laminated Mesh Reinforcement Stringer

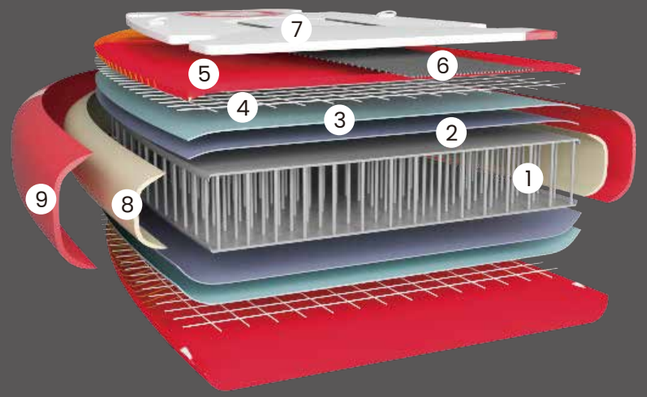

TECHNOLOGY

DUPLEX RIGID HEAVY DUTY TECHNOLOGY

DRHD™

A multi-layer composite structure combining high-density PVC, drop-stitch core, and reinforced layers improves power transfer efficiency, stability, and durability for competitive racing performance.

1. Drop Stitch Core (Polyester Yarn)
2. Double-Sided PVC Coating Layers
3. PVC Coating Layer
4. Reinforced Mesh Core
5. Printed PVC Coating Layer
6. Carbon Fiber Reinforcement
7. EVA Footpad
8. PVC Rail Bonding Layer
9. Decorative Laminated Mesh Layer

COSMETIC ART PRINTING

CAP™

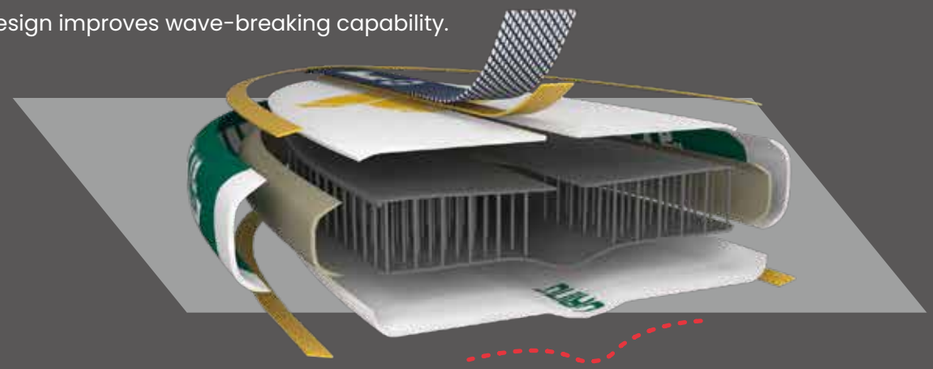

High-adhesion coating layers combined with durable printing processes enhance resistance to fading, peeling, and wear, maintaining a vivid and premium appearance over time.

V-SHAPE HULL ENTRY

VHE™

Bow shape design improves wave-breaking capability.

HFW INTEGRATION

HFW™

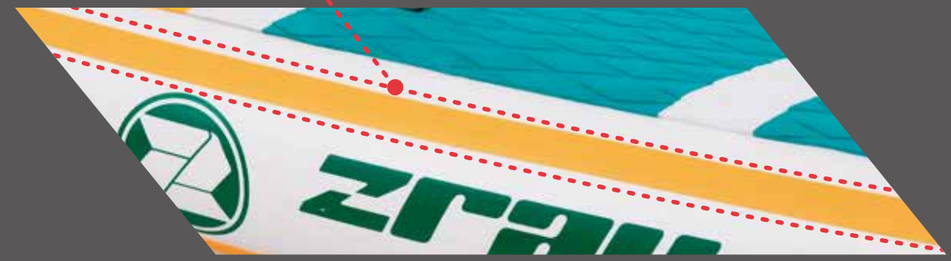

High-frequency welding provides a high-strength fit for the original accessories which were glued.

REINFORCED PROOF EDGE

RPE™

Additional air tightness and appearance decoration.

PADDLE

Paddles are critical to paddleboarding. The greatest influence is the speed and direction of gliding. Flexibility and strength are the main factors in choosing a paddle, and with different materials, clamps and handles, different paddles will bring different paddling experiences.

TECHNOLOGY

Handle
The ergonomic top and wide grip create powerful leverage of the entire paddle.

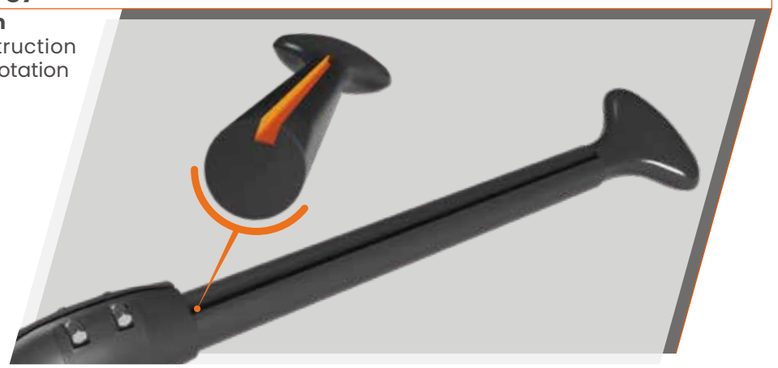

Shaft Clamp System
Different clips determine the linkage of the multi-section paddles.

Composite Blade
Different components of blade affect weight and water repellent ability.

Shaft Technology

Anti-twist system
Pre-slotted construction prevents paddle rotation during use.
